ALL AMERICAS for 1955 Now Ready!

• PETUNIA Prima Donna Hybrid Petunia

"Prima Donna" petunia is the newest improved F1 hybrid in the giant dwarf fringed grandiflora class. It is an improvement over "Bolero" and a bright rose-pink counterpart or version of the 1952 All-America winner Ballerino.

Being a first generation hybrid, it does have the desired vigor, uniformity, true large size and delightfully fringed and wavy petalled flowers on 12-inch bedding type plants.

Pkt. 50c

• CELOSIA Toreador

Striking New Annual

"Toreador" celosia is the striking new annual. Much richer and brighter red than the crimson colored earlier cockscombs, "Toreador" really sets you on fire. Foliage is lighter green, contrasting with the unusually large combs of uniform color and even growth.

"Toreador" is a great size and color improvement over Royal Velvet. It has more compact, largest cockscomb heads of the cristata type. It reaches about 2 feet by the end of the growing season and concentrates most of its flowering in one high center comb.

Pkt. 25c

COLLECTION

1 each above 4 for only \$1 35

• **COLUMBINE McKana's Giants** Trials showed it superior to other hybrid columbines, with larger flowers, longer spurs and much richer and more beautiful colors than comparison strains.

Huge blooms 3 to 4½ in. across, in a gay mixture of clear colors.

Strong bushy plants reach 3 feet tall and the striking terminal flowers are well supported on long wiry stems above lacy foliage.

Pkt. 50c

FIRST PINK MORNING GLORY CANDY PINK

New!

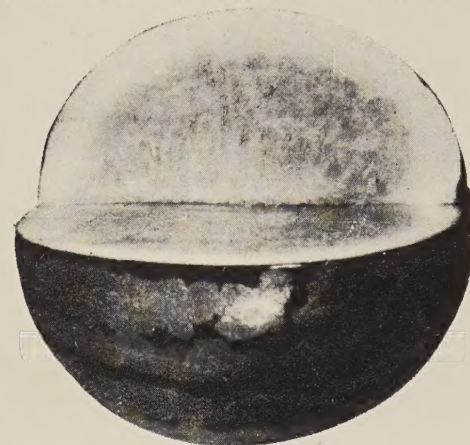

Candy Pink is reported by the grower to be the first pink Morning Glory ever created. A completely new color—pink—America's favorite flower color. The big 4" diameter flowers are of a lovely and cheerful shade of bright rose-pink salmon, pure and sparkling. The flowers remain open but one day, through each morning a completely new set is born, and this continues throughout the summer and until fall frosts. Candy Pink is an easily grown annual vine, often reaching a height of 15 to 20

Announcing - - - THE INTRODUCTION OF SEEDLESS WATERMELON

SWEET FINE FLAVOR — ICE BOX SIZE

... It's NEW. Eat watermelon without annoyance of extracting seeds; seeds undeveloped as in Cucumbers, may be eaten without affecting it's delicious flavor;

"Japanese seedless watermelons have produced fruits of outstanding quality and flavor during the three years of trial at the Horticultural Farm, Kentucky Agricultural Experiment Station. A considerable number of the new and standard varieties of regular watermelons have also been on trial during this period, but none consistently produced fruits as high in quality as the Japanese seedless melons."

"Reports from over 100 people who tasted the seedless watermelon from this experiment were very favorable as to quality and flavor. The School of Home Economics considered the rather small size as a definite advantage considering the ease of storing in a home refrigerator and the fact that one melon cut in four parts made very desirable-sized servings." Pkt. 10 seeds 60c; (20 seeds) \$1.00

"Pennsweet" muskmelon

one of the vegetable Bronze Medal Award winners for 1955, is a very early, small size fruit, a good yielder of high quality, sweet thick flesh. Recommended for short season areas

Vines are fairly vigorous with several melons of 1½ to 2 pounds, slightly longer than wide and very thick fleshed. Flesh color is salmon **pkt. 25c**
